

Small N Working

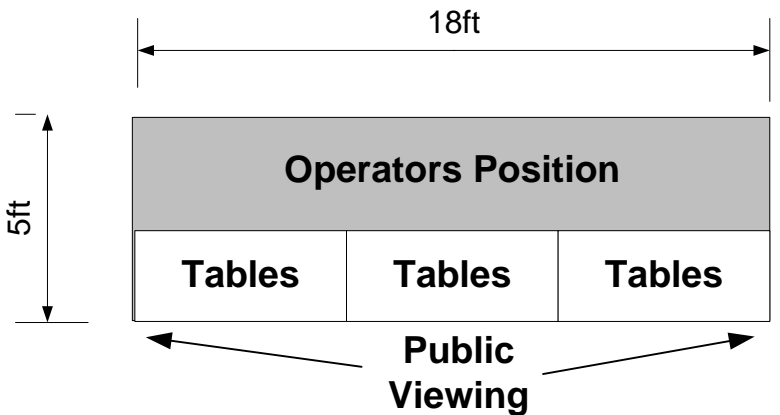

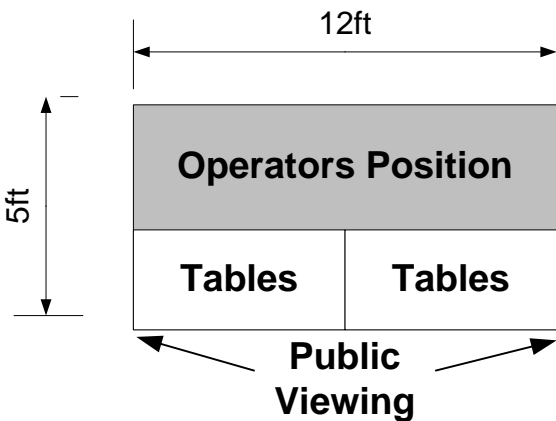

Description

This is an exercise in minimalism even by N Gauge standards. A small and light hearted display of working N Gauge trains in what might seem impossibly small spaces. The cry or moan "I don't have room for a layout" should not be heard any more.

Option 1

Option 2

Please note that I would need 2 or 3 6ft x 2ft tables to display my layouts plus one 13amp socket
Thank-you
